Why try to fit a **SQUARE PEG** into a **ROUND HOLE?**

HOMELAND AND WAYMARK ARE THE "PERFECT MATCH".

Homeland and Waymark work together to manufacture railing systems.

Waymark's Summit brackets are designed for a "perfect fit" to Homeland's railing profiles. Other companies manufacture their accessories with an oversize corner radius limiting the range of compatibility to other profiles. By combining Homeland profiles with Waymark accessories your caps and brackets will look beautiful and will not stick out as a "piece-together" project.

Systems are tested for ICC Building Code compliance

Homeland and Waymark have invested into the safety of products by extensively testing Deck and Rail systems for International Building Code compliance. This is backed by our Quality Assurance program and third party audits. We believe that your railing project should not be compromised with profiles and accessories that have not been tested as a system.

Homeland and Waymark are color matched

Are you tired of buying accessories from a company that the colors don't match perfectly with your profiles? Waymark products, through quality control systems, are virtually color matched to Homeland's profiles. Your caps, lighting, brackets, lattice, column, post, and spindles will be a perfect color match to all Homeland profiles.

That's why we say, Homeland and Waymark sell systems...not accessories!
